

Attention Patients!

Florida Doctors Need COVID-19 Vaccines to Give to Patients

Florida doctors want to provide COVID-19 vaccinations to their patients, but currently they are not prioritized to receive and distribute the vaccine. Doctors have established safety protocols for vaccinating patients already. They know best how to treat their patients, including, but not limited to:

- those who are 65 and older and may have challenges with multiple online and digital registrations;
- those who are high risk patients who cannot wait outdoors in long lines;
- those who are taking additional medications that must be assessed and monitored for interactions.

If you agree and want your doctor to provide vaccines, sign the petition now! Let State decision makers know you want your trusted doctor to be in charge of your health care.

Go to www.pbcms.org to sign the petition.
